EDUCATION

Sahyadri College of Engineering & Management

Mangaluru, Karnataka

Bachelor of Engineering in Computer Science (CGPA: 8.6/10.0)

Aug. 2024 – May 2028

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication

Database: MongoDB, Supabase, Firebase

Developer Tools: Git, GitHub, Postman, VS Code, Vercel, Render

PROJECTS

FleetGuard – Enterprise Fleet Management SaaS (Team Project) | *React, Node.js, Supabase, Jest* Jun. 2026

- Collaborated in a development team to build a full-stack B2B SaaS platform for fleet compliance, driver assignments, and service tracking.
- Engineered a Predictive Maintenance engine in Node.js analyzing odometer logs to calculate vehicle risk scores and automate service flags.
- Implemented Role-Based Access Control (RBAC) via JWT middleware for distinct Admin, Manager, Mechanic, and Driver permissions.
- Designed analytics dashboards using Tailwind CSS/Recharts and validated core backend algorithms with Jest unit test coverage.
- Repository: github.com/Atul-Kumar29/FleetGuard

LocalFinder – Dual-Portal Local Service Platform (2nd Place Award) | *Next.js 16, Express, MongoDB, Socket.IO* May

- Architected a dual-portal full-stack application (Customer & Provider) for service discovery, real-time messaging, and booking workflows.
- Engineered a proximity search engine leveraging MongoDB 2dsphere indexing and \$geoNear aggregation pipelines for accurate matching.
- Implemented room-based real-time chat via Socket.IO with persistent message storage and an automated sequential invoicing module.
- Secured 20+ RESTful APIs with JWT authentication and role-based middleware; awarded 2nd Prize at CSE Innovation Showcase.
- Links: [GitHub](#) | [Customer Portal](#) | [Provider Portal](#)

Result Analyzer using Gemini AI API | *Gemini API, Firebase, React, Vercel* Feb. 2026 – Mar. 2026

- Engineered a full-stack AI result analysis platform using Gemini API to generate automated student performance insights.
- Integrated Firebase Authentication and Cloud Firestore for secure session handling and real-time database management.
- Built interactive React dashboard components for dynamic performance rendering and deployed production build on Vercel.

ACHIEVEMENTS

1st Place – Open Sprint 2026: Secured 1st position across three technical evaluation rounds in an open-source contribution event organized by Sahyadri OpenSource Women Community (SOSWC) under SOSC; awarded by Head of CSE Dept.

2nd Place – CSE Department Innovation Showcase (2026): Won 2nd prize out of department entries for designing and building the LocalFinder full-stack platform.
